6 Predictors classified...
No variables removed since no ID or low-information variables found in data set
To fix these data quality issues in the dataset, import FixDQ from autoviz...
All variables classified into correct types.

	Data Type	Missing Values%	Unique Values%	Minimum Value	Maximum Value	DQ Issue
Age	int64	0.000000	28	15.000000	74.000000	No issue
Sex	object	0.000000	1			No issue
BP	object	0.000000	1			No issue
Cholesterol	object	0.000000	1			No issue
Na_to_K	float64	0.000000	NA	6.269000	38.247000	Column has 8 outliers greater than upper bound (32.78) or lower than lower bound(-2.96). Cap them or remove them.
Drug	object	0.000000	2			No issue
